Cats

ABOUT ME

I am web developer who likes to experiment with styles & design. I am not scared by devops stuff and I really enjoy coding in Python and JavaScript. Recently I have been developing hybrid mobile applications. I think being a programmer is much like being a special kind of detective and I like a good riddle.

EXPERIENCE

Junior Full Stack Developer   06.2017 - Present
Bravelab (bravelab.io)
Cracow (on site & remote)

Technologies: *Angular 4, AngularJS, Ionic, Protractor, Python, Django, Docker, React, React Native, Amazon S3, Firebase*

During my work in Bravelab Software House I develop many different projects - from Angular 4 applications to automated frontend deployment to Amazon S3. My responisibilities are:

- Migrating static sites to Angular 4 + Django + Docker.
- Developing Angular 4 and React applications.
- Developing Ionic and React Native mobile apps.
- Implementing contact forms using Firebase Realtime Database and Firebase Cloud Functions for sending emails.
- Automated frontend deployment to Amazon S3 with TravisCI.
- Writing automated E2E tests (Protractor) runned on CrossBrowserTesting.com integrated with TravisCI.
- Writing unit tests for Flask backend.
- Contact with clients.

Freelancer   2016 - 2017

Technologies: *HTML5, CSS3, SCSS, JavaScript, jQuery, Bootstrap, Python, Django*

Designing and developing websites using Java Script and Django. Key features:

- Django Admin
- Customized maps with Google Maps
- Clickable svg overlays

FREELANCE PROJECTS

Gleń Ryś - Site for a small power tools shop.
Frontend: *Bootstrap, jQuery*
Backend: *Django*
Url: *https://glenrys.pl/*
